Picloram+D Herbicide
Selective Weed Control

Season long broadleaf weed control ideal for improved pastures and rangelands to help improve forage production.
Picloram+D Herbicide
Selective Weed Control

Season long broadleaf weed control ideal for improved pastures and rangelands to help improve forage production.

- Can be used in desirable grasses such as bahia, fescue, bluegrass, orchardgrass, bromegrass, Bermuda and native grasses.
- Specifically designed for rangeland and pasture use.
- Controls many annual and perennial weeds.
- Foliar- and soil-active.
- Prevents encroaching brush.
- No grazing restrictions, except for lactating dairy animals.

- Pricklypoppy, annual
- Puncturevine
- Ragweed, common, giant, lanceleaf and western
- Sagebrush, sand
- Snow-on-the-Mountain
- Sowthistle
- Thistle, Wavyleaf
- Thistles, biennial: bull, musk, plumeless, scotch
- Tropical Soda Apple
- Vervain, blue and hoary

Mixing Instructions

With continuous, vigorous agitation:
1. Add half the amount of water to be used to the spray tank.
2. Add the amount of Picloram+D required for the total volume of spray being mixed.
3. Premix the required amount of oil with an emulsifier such as Sponto 712 or Triton X-100, using the manufacturer’s recommended rate of emulsifier per gallon of oil. Add the oil-emulsifier premix to the spray tank.
4. Finally, add the remaining amount of water required to bring the spray batch to the desired total volume.
5. Maintain agitation in the spray tank during application.

Active Ingredient(s):

- Picloram: 4-amino-3,5,6-trichloropicolinic acid, trisopropylammonium salt...........................................10.2%
- 2,4-Dichlorophenoxyacetic acid, trisopropylammonium salt.................................................................39.6%

OTHER INGREDIENTS: .......................................................................................................................................75.6%
TOTAL: ..............................................................................................................................................................100.0%

Alligare Picloram+D contains the following acid equivalents: picloram: 4-amino-3,5,6-trichloropicolinic acid – 5.7% (0.54 lb./gal.)
2,4-dichlorophenoxyacetic acid – 21.2% (2 lbs./gal.)
