PRODUCT:

GUNSLINGER® P+D Herbicide

Selective Weed Control

Gunslinger® P+D Herbicide Use Sites

- Control of broadleaf annual and perennial weeds, and certain woody species on Conservation Reserve Program (CRP) acres, rangeland and permanent grass pastures
- Control of unwanted annual and perennial broadleaf weeds and woody plants and vines on forest planting sites and non-crop areas including industrial, manufacturing and storage sites; rights-of-way, such as railroads, electric power lines, communication lines, pipe lines, highways; and wildlife openings in forest and non-crop areas

For Best Results:

Herbicidal effects of Gunslinger® P+D occur primarily from uptake by plant foliage and translocation throughout the plant; however, secondary herbicidal activity may occur from soil uptake of picloram. Broadleaf plants can be killed or damaged by very small amounts of Gunslinger® P+D.

Season long broadleaf weed control ideal for improved pastures and rangelands to help improve forage production.

- Can be used in desirable grasses such as bahia, fescue, bluegrass, orchardgrass, bromegrass, Bermuda and native grasses.
- Specifically designed for rangeland and pasture use.
- Controls many annual and perennial weeds.
- Foliar- and soil-active.
- Prevents encroaching brush.
- No grazing restrictions, except for lactating dairy animals (see product specimen label for specific restrictions).

Targeted Weeds

Absinth Wormwood	Goldenrod	Oxeye Daisy
Aster, Heath	Hemlock, poison	Pennycress, field
Bitter Sneezeweed	Hemp (marijuana)	Pricklypoppy, annual
Blackberry	Houndstongue	Puncturevine
Broom Snakeweed	Ironweed, western	Ragweed, common, giant, lanceleaf and western
Broomweed, annual	Jimsonweed	Sagebrush, sand

Burdock, common	Marshelder	Sowthistle
Buttercup	Mesquite sprouts	Thistle, Wavyleaf
Cactus, Pricklypear or Cholla	Mugwort	Thistles, biennial: bull, musk,
Curly Dock	Multiflora Rose	plumeless, scotch
Curlycup Gumweed	Nightshade, Silverleaf	Tropical Soda Apple
Devil's Claw	Oak Sprouts	Vervain, blue and hoary
Fleabane, rough		

Mixing Instructions

With continuous, vigorous agitation:

1. Add half the amount of water to be used to the spray tank.
2. Add the amount of Gunslinger® P+D required for the total volume of spray being mixed.
3. Add applicable adjuvants.
4. Finally, add the remaining amount of water required to bring the spray batch to the desired total volume.
5. Maintain agitation in the spray tank during application.

Active Ingredient(s):

Picloram: 4-amino-3,5,6-trichloropicolinic acid, triisopropanolamine salt.....	10.2%
2,4-dichlorophenoxyacetic acid, triisopropanolamine salt.....	39.6%
OTHER INGREDIENTS:.....	75.6%
TOTAL:.....	100.0%

Alligare Gunslinger® P+D contains the following acid equivalents: picloram: 4-amino-3,5,6-trichloropicolinic acid – 5.7% (0.54 lb./gal.)
2,4-dichlorophenoxyacetic acid – 21.2% (2 lbs./gal.)
