PRODUCT GUIDE

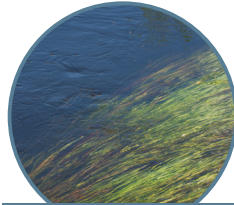

AQUATICS

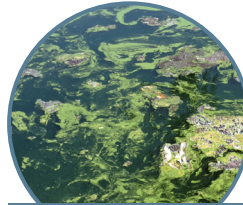

Aquatic vegetation management is essential for the protection and beautification of our waterways, wetlands, and protected natural areas. Alligare offers solutions that safeguard clear waterways for recreation, environmental protection, and producers alike.

EMERGED WEEDS

SUBMERGED WEEDS

ALGAE

IRRIGATION CANALS

FLOATING VEGETATION

RECOMMENDED SOLUTION	PERFORMANCE HIGHLIGHTS	USES
<p>ARGOS® Copper ethanolamine complex (Metallic copper equivalent)</p>	<p>A chelated copper herbicide and algaecide for use in a variety of aquatic ecosystems, including ponds, lakes, crop, and non-crop irrigation conveyance systems, and potable water reservoirs.</p>	
<p>ECOMAZAPYR 2 SL Imazapyr</p>	<p>A powerful, broad-spectrum herbicide used for tough-to-control, emerged and floating vegetation. Ecomazapyr provides flexibility and longevity due to the number of labeled application sites and approved application techniques.</p>	
<p>FLUMIGARD™ SC Flumioxazin</p>	<p>Used in surface and subsurface applications for quick control of challenging aquatic weed species such as duckweed. Flumigard SC makes an excellent tank mix partner with most herbicides and can also be used as a replacement for glyphosate or diquat.</p>	
<p>FLURIDONE Fluridone</p>	<p>A systemic, aquatic herbicide used to manage invasive and nuisance aquatic weeds, Fluridone can be used in surface and subsurface applications. With selective and broad-spectrum capabilities, this solution is effective in a wide array of water systems, including freshwater ponds, lakes, irrigation and drainage canals, reservoirs, and rivers.</p>	
<p>IMOX™ Imazamox</p>	<p>A highly selective, reduce risk and versatile herbicide that can be used in most aquatic application sites, Imox provides outstanding weed control and may be used in surface and subsurface applications. Imox's ability to target specific vegetation makes it ideal for applications in and around sensitive areas.</p>	
<p>MAGNACIDE® H Acrolein</p>	<p>This solution is a broad-spectrum, in-season aquatic herbicide for irrigation canals that has no vegetation clean-up requirements or irrigation restrictions. Magnacide H controls submersed aquatic weeds and algae causing them to disintegrate within a few days of treatment.</p>
