

EXPERIENCE SUPERIOR MANAGEMENT PERFORMANCE WITH THE ULTIMATE HERBICIDE FOR ALLEVIATING UNWANTED BROADLEAF WEEDS

Alligare's Flagstaff herbicide provides selective, post-emergent control and suppression by controlling stubborn and resistant vegetation.

PERFORMANCE HIGHLIGHTS

- Unrestricted product with no grazing restrictions and no soil activity
- Treatment is effective in an expansive range of use sites
- Supports the release of desirable grasses through the control of troublesome weed species
- Combats hard-to-control weeds and brush including Sericea lespedeza, dogfennel, kochia, and prickly pear cactus

FOR BEST RESULTS

- 1. Apply to young, rapidly growing weeds that are not drought stressed.
- 2. Use high-quality ag surfactants such as methylated seed oil or non-ionic surfactant.
- 3. Use labeled rates for target weed species.

USE SITES

- rangeland
- permanent grass pastures
- CRP fields
- wildlife management areas
- established turfgrass

- rights-of-way
- fallow cropland
- railroads
- public utility sites
- recreation areas

FLAGSTAFF

ACTIVE INGREDIENT: FLUROXPYR 2.8 LB/GAL

TARGETED WEEDS

Catchweed bedstraw Cocklebur (common) Jimsonweed

Prickly pear cactus

Ragweed

Chickweed (common)

Dogfennel Kochia

Puncturevine

Sericea lespedeza

Purslane (common)

Hemp dogbane

Tropic croton

White clover

Stinging nettle

Morning glories

Blackberry

Ironweed

Horse nettle

Sumac

BROADCAST MIXING INSTRUCTIONS

- 1. Add ½ of the required spray volume to the spray tank and start agitation.
- 2. Add the required amount of Alligare Flagstaff herbicide.
- 3. If tank mixing this product with other labeled herbicides, first add dry flowables followed by wettable powders. Follow this with aqueous suspensions (e.g., suspension concentrate, SC), flowables, or liquids, then mix thoroughly.
- 4. Add any additional surfactants.
- 5. Agitate during the final filling of the spray tank, and maintain sufficient agitation during application, to ensure uniformity of the spray mixture.

Note: Flagstaff herbicide is a vital tool in fighting ALS (Acetolactate synthase) and glyphosate-resistant weeds. Using this product at the labeled rates will delay and aid in the fight against resistance to Flagstaff herbicide.

ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS
