

FIFRA Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATES OF TEXAS

Only for the control of Giant Salvinia (*Salvinia molesta*)

Alligare PRO MSM 60 Herbicide

Expiration Date: This label is valid until December 31, 2024, or until otherwise amended, withdrawn, canceled, or suspended.

EPA Reg. No. 81927-7

SLN No. TX-190003

CAUTION

Alligare PRO MSM 60 Herbicide is a dispersible granule that is mixed in water and applied as a foliar spray. The use of Alligare PRO MSM 60 Herbicide under this Special Local Need registration is specific to applications(s) for control of Giant Salvinia (*Salvinia molesta*) in/on freshwater sloughs, marshes, lakes and other quiescent water bodies which are managed and /or regulated by the state or federal agency responsible for aquatic plant management activities.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The SLN label must be in possession of the user at the time of pesticide application.

Target Pest Species

Giant Salvinia (*Salvinia molesta*)

Application Sites

Freshwater sloughs, marshes, lakes and other quiescent waters which are managed and/or regulated by the state or federal agency responsible for aquatic plant management activities.

Application

Apply 0.5-1.0 ounce of Alligare PRO MSM 60 Herbicide for broadcast or spot applications. Select a spray volume and delivery system that will ensure thorough coverage and uniform spray pattern (typically 50-100 GPA).

Restrictions and Limitations

Do not apply more than 1.0 ounce of Alligare PRO MSM 60 Herbicide via broadcast applications(s) per acre per year (i.e. every 12 months).

Do not apply this product through any type of irrigation system.

Only make applications to areas where the surrounding water/or receding waters are not used for drinking water wells. In potable water sites, do not apply Alligare PRO MSM 60 Herbicide within one-fourth mile (1320 feet) of any functioning potable water intake.

Do not use treated water from the application area for irrigation purposes.

Method of Application

Make broadcast applications by ground application or by aerial application (helicopter only). Use a high-pressure sprayer and hand gun, portable equipment such as backpack sprayers, or hand-held sprayers for spot applications. Use an aquatic non-ionic surfactant per surfactant directions.

Use of this product must be in following with Best Management Practices. Refer to the Federal Section 3 label for additional product information, precautions and restrictions.
