

## GIVE PROBLEM WEEDS THE ONE-TWO PUNCH

Alligare's Krovar IVM herbicide provides proven, season-long control of annual and perennial grasses and broadleaf weeds.

#### PERFORMANCE HIGHLIGHTS

- Consistent, historically-proven performance
- Tough on challenging annual and perennial weeds
- Provides long-lasting residual control
- Can be used under asphalt and other paved areas

#### FOR BEST RESULTS

- 1. Apply to moist soil or soil that has received precipitation within two weeks of application.
- 2. Applications should be made prior to weed germination.

#### **USE SITES**

- utility plant sites
- petroleum tank farms
- pumping installations
- roadsides and rights-of-way
- fence rows
- pipelines
- railroads
- storage areas

# KROVARIVI

### **ACTIVE INGREDIENTS: BROMACIL + DIURON**

#### TARGETED WEEDS

Clover (annual) Bluegrass Cheat grass Horseweed Pigweed **Bahiagrass Johnsongrass** Crabgrass Kochia Wild carrot Plantain Ragweed Spurge Bermudagrass Curly dock Fescue

Foxtail Italian ryegrass Puncturevine Russian thistle

#### MIXING INSTRUCTIONS

- 1. Fill the tank 1/4 to 1/3 full of water.
- 2. While agitating, add the required amount of Krovar IVM.
- 3. Continue agitation until the herbicide is fully dispersed.
- 4. Maintain agitation and continue filling the tank with water.
- 5. Add any tank mix partners (if desired), followed by the necessary volume of spray adjuvant.

NOTE: If the mixture is not continuously agitated, settling may occur. If settling occurs, thoroughly re-agitate before using.

#### ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS
