Imazapyr 7.78%

Diuron 62.22%

PRODUCT:

# Mojave 70 EG

Vegetation Control

Alligare.com

Mojave 70 EG provides complete burndown and residual bareground vegetation control on a vast number of grasses, weeds, and vines.

Alligare. The Leader In Advanced Herbicide Solutions.<sup>sm</sup>

CATEGORY: Industrial Bareground

ACTIVE INGREDIENT: Imazapyr 7.78%  
Diuron 62.22%

PRODUCT:

# Mojave 70 EG

Vegetation Control

## Mojave 70 EG Use Sites

- Non-cropland areas such as railroad, utility, pipeline and highway rights-of-way, utility plant sites, petroleum tank farms, pumping installations, fence rows, storage areas, farmyards and around farm buildings, non-irrigation ditchbanks, and other similar areas where bare ground is desired.
- Can be used under asphalt, pond liners and other paved areas, but ONLY in industrial sites or where the pavement has a suitable barrier along the perimeter that prevents encroachment of roots of desirable plants.

## Mixing Instructions

Thorough mixing and continuous agitation are important to ensure uniform application. Fill the spray tank half-full of water. Start agitation and continue agitation during entire mixing and spraying operation. Add the required amount of Mojave 70 EG and allow it to mix thoroughly while completing the spray tank filling. If additional product is a liquid, add slowly while filling remainder of tank with water. Material must be kept in suspension at all times by continuous agitation.

Mojave 70 EG provides complete burndown and residual bareground vegetation control on a vast number of grasses, weeds, and vines.

- Translocated into and kills roots and underground storage tissue in target weeds.
- Long application window – spring to fall.
- Cost effective site prep solution – provides broad spectrum, long-lasting control.
- Compatible with other herbicides to maximize residual control spectrum.
- When applied as an oil emulsion – cuticle wax is dissolved increasing herbicide absorption and enhancing effectiveness.

## Targeted Weeds

<b>Grasses</b>	Bindweed (field, hedge)	Horsenettle
Bahiagrass	Kudzu	Japanese bamboo
Barnyardgrass	Morning glory	Knapweed (diffuse, Russian)
Canada bluegrass	Poison ivy	Kochia
Downy brome	<b>Brush Species</b>	Lambsquarters
Foxtail	Black locust	Lespedeza
Johnsongrass	Hawthorn	Milkweed
Orchardgrass	Russian olive	Pepperweed
Phragmites	Willow	Pigweed
Quackgrass	<b>Broadleaf Weeds</b>	Puncturevine
Rattail fescue	Broom snakeweed	Purple loosestrife
Sandbur	Burdock	Ragweed (common, Western)
Smooth brome	Clover	Rush skeletonweed
Wild barley	Corn spurrdandelion	Sunflower
Wild oats	Dock	Thistle (bull, Canada, Russian, Texas)
Witchgrass	Filaree	Wild lettuce
<b>Vines and Brambles</b>	Grey rabbitbrush	Yellow starthistle
Blackberry	Groundcherry	

## Active Ingredient(s):

Imazapyr (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-3-pyridinecarboxylic acid).....	7.78%
Diuron (3-[3,4-dichlorophenyl]-1, 1-dimethylurea).....	62.22%
OTHER INGREDIENTS:.....	30.0%
TOTAL:.....	100.0%

## For Best Results:

When applied either preemergence or postemergence to weeds, Mojave 70 EG will control most annual and perennial grasses and broadleaf weeds in addition to many brush and vine species and Mojave 70 EG will provide residual control of labeled weeds which germinate in the treated areas. For annual weed control, preferably apply Mojave 70 EG either at late preemergence-to-early postemergence for best results. For perennial weed control, Mojave 70 EG must be applied postemergence to the target weeds, since it will not control un-emerged perennial weeds. For maximum effect, weeds should be growing vigorously at the time of postemergence application and the spray solution should include a surfactant.

Mojave 70 EG may injure or kill most desirable plants and crops. Avoid applications of Mojave 70 EG to powdery-dry soil or sand soils when there is little likelihood of rainfall soon after treatment, since subsequent off-target movement of treated soil by water and/or wind may cause damage to adjacent desirable plants or crops.
