

ROTARY 2 SL

ENHANCE THE HEALTH AND VITALITY OF FOREST AREAS WITH THIS EFFECTIVE AND SUSTAINABLE SOLUTION

Alligare's Rotary 2 SL is a proprietary formulation that provides excellent control of undesirable vegetation in forestry site preparation and conifer release programs.

PERFORMANCE HIGHLIGHTS

- Controls most grasses, broadleaf weeds, vines, brambles, and hardwood brush
- Can be applied over the top of most pine and spruce species
- Provides broad-spectrum control of 195 annual, biennial, and perennial weeds and brush
- May be applied as a broadcast, targeted handgun, low volume, cut stump, or basal application

FOR BEST RESULTS

1. Use a methylated seed oil or nonionic surfactant as an adjuvant to maximize efficacy.
2. Apply the spray solution uniformly to cover the foliage of undesirable vegetation.
3. Basal applications are best suited for low-density brush areas.
4. Precautions should be taken when applying Rotary 2 SL in sensitive areas and within the root zone of desirable plants and tree species.

USE SITES

- forestry sites
- drainage ditches
- pastures and rangelands
- rights-of-way

ROTARY 2 SL

ACTIVE INGREDIENT: IMAZAPYR 2 LB/GAL

TARGETED WEEDS

Alder
Cottonwood
Oak
Poplar
Sumac
Boxelder

Brazilian pepper
Chinese tallow
Cherry
Red maple
Saltcedar
Honeysuckle

Cogongrass
Giant ragweed
Sericea lespedeza
Johnsongrass
Poison ivy
Sweetgum

Phragmites
Privet
Puncturevine
Russian olive
Wild carrot
Willow

BROADCAST MIXING INSTRUCTIONS

1. Add ½ of the required spray volume to the spray tank and start agitation.
2. Add the required amount of Rotary 2 SL.
3. Add additional tank-mix herbicide partners as needed.
4. Add any surfactants.
5. Agitate during the final filling of the spray tank, and maintain sufficient agitation during application, to ensure uniformity of the spray mixture.

Note: Tank mixing with 2,4-D or other phenoxy-type herbicides could lead to reduced control of perennial grass weeds.
