

DIURON 80 DF

HISTORICALLY PROVEN PERFORMANCE FOR PERSISTENT CONTROL OF UNWANTED WEEDS

Alligare's Diuron 80 DF provides pre- and post-emergent control of a variety of annual and perennial grasses and broadleaf weeds.

PERFORMANCE HIGHLIGHTS

- Consistent performance
- Can be used as a tank-mix partner for resistance management
- Excellent on annual grasses, such as crabgrass, foxtail, and annual ryegrass
- Can be applied as a dry application, using ground equipment to distribute granules uniformly to the target area

FOR BEST RESULTS

1. Best results are obtained when rainfall occurs within two weeks following application.
2. Optimal post-emergent control is achieved when applications are made when humidity is elevated and temperatures are above 70 degrees.

USE SITES

- airports
- drainage ditches
- utility and railroad rights-of-way
- highways
- fence rows
- pipelines
- storage areas
- industrial sites

DIURON 80 DF

ACTIVE INGREDIENT: DIURON 80%

TARGETED WEEDS

Bluegrass (annual)
Dogfennel
Horsenettle
Horseweed

Pigweed
Pokeweed
Ragweed
Sesbania

Crabgrass
Foxtail
Quackgrass
Ryegrass (annual)

Kochia
Spanishneedles
Sandbur
Maidencane

MIXING INSTRUCTIONS

1. Fill the tank 1/4 to 1/3 full of water.
2. While agitating, add the required amount of Diuron 80 DF.
3. Continue agitation until the herbicide is fully dispersed.
4. Maintain agitation and continue filling the tank with water.
5. Add any tank mix partners, if desired, followed by the necessary volume of spray adjuvant.

ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS

SIGNAL WORD

CAUTION

APPLICATION DETAILS

MOA Group 5 PSII inhibitor
Use Rates 5 - 15 lbs./acre

WORKER SAFETY

long-sleeve shirt and long pants
shoes plus socks
chemical-resistant gloves

Mixers, loaders, and other applicators/handlers must wear a NIOSH-approved particulate filtering respirator equipped with N, R, or P class filter media (the respirator should have a NIOSH approval number prefix TC-84A).
