

A DEFINITIVE SOLUTION FOR A WEED-FREE HORIZON

Alligare's Passage is a pre- and early post-emergent, quick-start solution with unmatched staying power for extended residual control of challenging, herbicide-resistant weeds. This versatile and persistent product provides vegetation managers with a long-term response to problematic weeds.

PERFORMANCE HIGHLIGHTS

- Extended residual control of many broadleaf weeds and annual grasses in a variety of settings
- Targets species' young tissues and provides staying power due to its soil half-life of 120-300 days
- Early post-emergent control achieved by rapid foliar desiccation
- Helps manage species resistant to synthetic auxin herbicides and ALS, PSII, and EPSPS inhibitors
- Will increase weed control spectrum and persistence in bare-ground applications

FOR BEST RESULTS

- 1. Precipitation is needed following the application to optimize pre-emergent control, particularly in bareground settings.
- 2. To maximize product efficacy consider soil type and soil pH of the application site and the impact on the concentration of Passage in the soil solution.

USE SITES

- railroad
- industrial areas
- highway
- roadsides

- pipeline and utility rights-of-way
- fencerows and non-crop areas
- labeled agricultural crops
- established turfgrass

ACTIVE INGREDIENTS: SULFENTRAZONE 4 LB/GAL

TARGETED WEEDS

Spurges (annual) Crabgrass Goosegrass Kochia

Lambsquarters Milkweed Morning glories Nutsedge

Palmer amaranth Pigweed Puncturevine Russian thistle

Sedges Toadflax Waterhemp Witchgrass

MIXING INSTRUCTIONS

- 1. Add ¾ of the required spray volume to the spray tank and start agitation.
- 2. Add the required amount of Alligare Passage herbicide.
- 3. Add surfactants, crop oils, or other adjuvants according to the manufacturer's label.
- 4. Add spray thickening agent, if needed to control drift, according to the manufacturer's label.
- 5. Agitate during the final filling of the spray tank, and maintain sufficient agitation during application, to ensure uniformity of the spray mixture.

Note: Due to its selectivity, Passage is safe to apply to established turfgrasses including residential and institutional lawns, athletic fields, golf course fairways and roughs, and commercial sod farms.
