

TRIUMPH RTU

ALLIGARE.COM

KNOCKOUT CHALLENGING BRUSH SPECIES WITH THIS READY-TO-USE, APPLICATOR-FRIENDLY HERBICIDE

Alligare's Triumph RTU effectively controls unwanted trees and prevents the undesirable sprouting of cut trees.

PERFORMANCE HIGHLIGHTS

- Product comes with a squeeze nozzle in a ready-to-use container with no mixing required
- Ideal for the control of hard-to-kill weeds and brush species
- Excellent for the treatment of small areas with susceptible invasive weeds and brush
- Multiple application methods allow for a variety of uses
- Unrestricted product

FOR BEST RESULTS

1. If applying Triumph RTU as a cut stump treatment, apply immediately after cutting and thoroughly wet the cambium area next to the bark.
2. If a frill girdle application is used, make a single hack girdle or "frill" of overlapping ax cuts through the bark, around the tree, and paint or spray the injured surface with Triumph RTU immediately after hacking.

USE SITES

- forest sites
- fencerows
- rights-of-way
- non-cropland areas
- roadsides
